Moose Lodge #1392, NRA, AOPA.

SPECIAL INTERESTS:
Hunting, fishing, private pilot.

STATEMENT:

Subsistence

The federal government needs to be taken out of fish and game. Predator control of wolves and bears when applicable, there should be a Max sustained yield program in place with co-management.

Development

More exploration of resources, Limestone, Copper, Silver, Diamonds, iron ore, lead, gold, antimony, oil, gas, and coal. Initiate programs to maintain a sustainable yield timber industry. Promote fish, shrimp, kelp, scallop, clam, oyster, and marketable aquatic industries. Develop oil and gas to lower power cost.

Education

If vouchers are made available, the money goes to the institution. Expand charter schools. Create a revenue endowment fund that is based on the concept of the Alaska dividend program, but is off limits to political money manipulation. Increase the school funding formula.

State Government

Privatize areas of the transportation department that are in remote locations. Cap the growth of State Government at 2% creating a saving of 1.5% over inflation. Merge the redundant programs together to lower the cost of government to Alaskans. Promote a leaner smarter government.

Revenue

No state income tax or state sales tax should be enacted without the vote of the registered voters of Alaska! Increase resource development in order to maximize royalties to the State of Alaska.

Permanent Fund

No raiding and no flat line dividend. Reduce the size of government in a safe manner. Keep inflation proofing intact. The size of government will not be smaller if you feed it with Permanent Fund dollars!
